What Is a Mean ?

....a single thing that is made of many unique and separate parts can be more beautiful and exquisite, more important, more useful or in some other way “greater” than all of the separate parts on their own.

If you take all the parts of an antique and hand-made Swiss watch and lay them out on the table, they cannot tell the time the way an assembled watch. The whole is truly more than the sum of the parts.

Our suppliers make us who we are. They were chosen for many reasons, above all, for their embraced quality and performance.

Remember Our Mantras:

- 1) Quality Always Matters
- 2) We Change Lives
- 3) Lose Money... but NEVER LOSE TRUST

Let us introduce some of y/our **TEAM** (**T**.ogether **E**.veryone **A**.chieves **M**.ore) or, better yet, let our partners introduce themselves in their own words. We believe in them and as their customers, we’ve selected the best for our customers, as well.

Vision Art Aluminum always provide high quality customized products:

Vision Art Aluminum offers its customers something unique...its world class, quality products customized to fit your unique spaces. We don't knock down walls sending plaster dust into your home. We can't have you, your family and pets breathing in poor quality air. Can we?

It's a home environmental safety issue, actually. We don't know if there is insulation in the walls, is it Fiber-glas? Older homes did not have to comply with today's environmental standards. Open a wall and who knows what's in there.

Vision Art Aluminum knows you, your family and pets could be subjected to something like fiberglass which will cause respiratory distress when breathed in. This is why some contractors have to wear masks to do their work. Trust us, we customize around possible issues so you can have it quick, perfect, and safely.

What Vision Art Aluminum does is especially suited for precious families, pets and fine homes. Vision Art Aluminum customizes products...doors, windows, sunrooms, pergolas, etc. to YOUR unique space...your walls, yard, garden, in proportion to your home's space. This means your amazing, professional job is completed with less time, mess and more beauty is added to your already beautiful and prized home. We treat your home as sacred space just like you do.

As you can tell from our delighted customers on Google reviews, Vision Art Aluminum aims to please and we do it faster, cleaner and with the best products in the world with your comfort, timeline and safety in mind.

It's the reason why one of our customers, a Google reviewer, said this about us.

...“Everything is perfect.”

Freddy Tuncel
Owner/ Director

03.bifoldingdoor

Bi Folding Door

A bi-folding door is the ideal solution for homes with tight door-ways, in limited space and can be easily installed by homeowners themselves. Bi-folding doors can be used at terraces, balconies, kitchens, patios and interior or exterior areas. First, measure your opening. Use a large spirit level to make sure that the door is level and square. Then, measure the top, bottom, middle, diagonals of the opening. Next, measure the height of the middle and add half an inch for fitting tolerance.

Safety With Bi Folding Door

We also offer you the best in bi-folding door services.

Of course, safety, as with any type of door, should be a top priority. A bi-fold door is just as secure as a conventional French style or patio door. However, a standard 8-point locking system is recommended for added security. Using the correct tools, you can choose:

Maximum product quality and innovative comfort details extending to barrier-free solution...doors are operated as lightly as a feather and securely in every size, opening type and weight class.

Maximum air and water impermeability thanks to EPDM glass and acoustical gaskets.

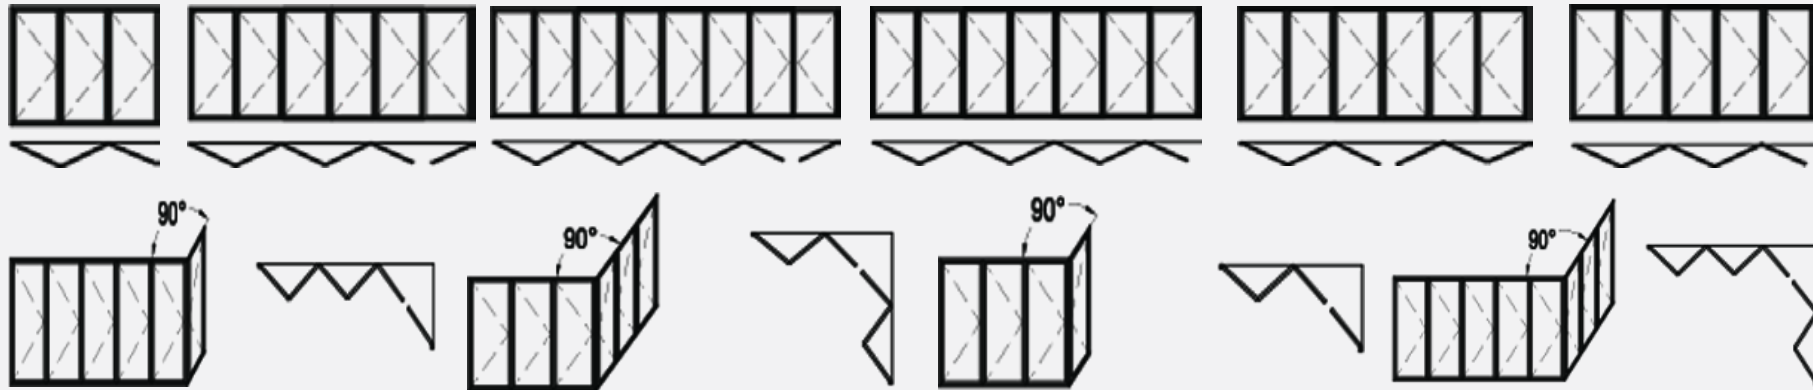

- Use of common glazing bead compatible with other systems
- Easy installation with pin connection
- Compatible design with THS62 system

04. bifolding door

05. bifolddoor

Expansion Types and Configurations

While installing a new door is a major home alteration, it is often possible to obtain permission for it under permitted development rights. When installing a bi-fold, it is important to consider the number of windows and doors you need in your home. In addition to adding privacy and security, you should also consider how much light the doors will allow. Vision Art Aluminum also offers superb quality in bi-folding door services. You can contact us on any issue you want, receive top quality advice, service and while doing transactions with a professional and expert team of pros.

Elegant & Stylish

Any size any design, we produce custom design doors as your needs.

Replace Entire Wall

Folding door provides a large opening and makes a connection to exterior area

Full Flexibility

To be used on a balcony, terrace or kitchen w/perfect fit for interior/exterior area

VISION PREMIUM

In addition to its aesthetic benefits, a bi-fold door can increase your home's security. A bi folding door can be configured with an unlimited number of door panels. It is a popular choice for homeowners seeking to create an indoor/outdoor living space. Its sleek design allows seamless access to an outdoor living area without the need for a separate entrance. Whether you want a corner or pocketing configuration, the bi-fold will suit your needs.

06. bifolding door

LIFT & SLIDE DOORS

The entire wall can be replaced with glass doors irrespective of the tremendous size and weight. The Vision Lift and Slide doors are very easy to operate with just a fingertip. Our outstanding thermal structure allows excellent insulation regardless of all bad weather conditions. The Vision Premium Sliding door has one of the best thermal insulations on the market. Vision premium doors can be used on terraces, balconies, kitchens, patios, open areas, or gardens. They visually expand the area and while letting in maximum sunlight and allows an area to look larger than it is.

07. lift&slidedoor

08. lift&slide door

**PANORAMIC
VIEW
with
LIFT&SLIDE
DOOR**

Many people does not imagine how the door can effect entire design. Hebe-Schiebe door has elegant looking and outstanding thermal and structural performance. Many doors can not be design large sizes, however, Hebe-Schiebe doors can be designed very large size and luxurious looking with entire wall replaced with the glassdoors? The best place to use our doors? Open areas, patio, garden, balcony, terrace, etc. Hebe-Schiebe doors in the room allows you to visually expand the area and let in maximum sun light

09.lift&slide door

High Quality Hardware

Maximum air and water impermeability in lift and slide doors thanks to system gaskets and EPDM glass. Some features;

- 45° corners for case and wings
- Use of common press connection compatible with different systems.
- Comprehensive comprehensive framing within the overall framework of the binary, small and own rail system.
- Option to use wings on a single rail frame that can slide towards the wall.
- Wing and wings special joint detail.
- Option to use wings reinforced with additional profile.
- Designs suitable for 660 lbs and 330 lbs transport mechanisms.
- Use of steel quality rail.

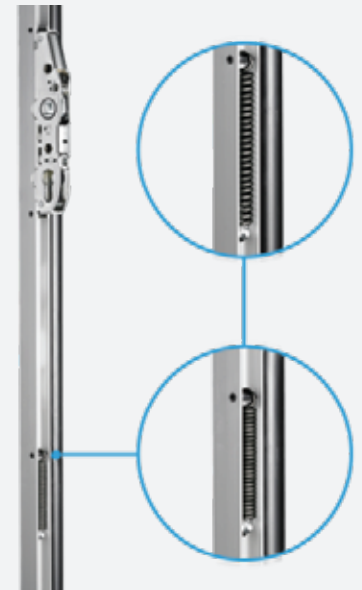

The Option for Even More Security

Whether you choose the standard or comfort gear, with hook bolt or locking bolt: You can of course also obtain gears from 440 lbs with cylinder locks that meet the highest security requirements. Ask us about the options.

Even Less Operating Force

A preassembled, ready-to-install damper unit is available as a comfort gear for these two locking types. A special spring hidden in the comfort gear uses the weight of the sash to reduce the torque and lift the sash even more easily.

10. lift&slide door

Ease and Efficiency Are a Question of Adjustment

- Integrated precision adjustment with readjustment reserves of 3 mm: quick and easy lifting of the sash at the back
- Saving time and costs for you: flexible and secure adjustment of the sash during assembly and perfect tolerance equalisation
- Greater ease of use for your customers: smooth sliding motion with high compression thanks to optimum adjustment opportunities on site suitable for sash weights of up to 660 lbs

Quality That You Grasp Immediately

- Noiseless locking and unlocking free of play with lasting high functional security
- Ergonomic and contemporary design
- Free colour selection: white, cream, brown, medium bronze, silver, titan matt light, F9 or black, can also be painted
- Large choice of versions ranging to the design with cylinder
- Perfectly coordinated with the hardware and the sash weight
- Matching the handles from the turn and tilt range in terms of color and design

11. multiplesliderdoor

MULTIPLE SLIDER DOOR

Unlike standard size slide doors, a multiple slider door can be adjusted to open and close as required. Multiple Sliding doors can be designed to be very large size. The hardware used in multiple sliding doors is typically provided by the manufacturer. Typically, these doors use recessed hand pulls in the door panel which is commonly found in homes. A sliding locking mechanism is usually used on the primary panel and relies on concealed and recessed locking.

**Extra Large is No Problem;
It's So Easy to Move**

Extra large opening area...it's even possible to replace entire wall which is not possible with other type of doors. It functions very quietly and extra easy to move. Lift and slide doors have outstanding thermal insulation, too. These are Vision Premium Doors with the latest advanced German technology and, of course, world class engineering. You can reduce utility bills and feel the comfort with these.

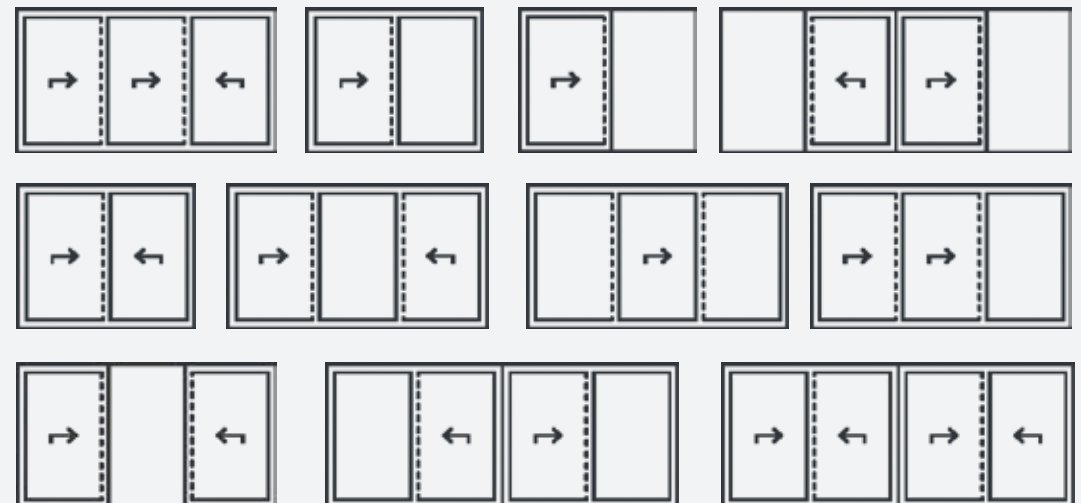

VISION PREMIUM

Extra large openings are an invitation to replace entire walls with glass doors. That's not possible with other type of doors but it is here. Of course, multiple slider doors function very quietly and are extra easy to move. Lift and slide doors have outstanding thermal insulation. These Vision Premium Doors have the latest outstanding German technology and engineering. You can reduce utility bills, assist Mother Earth and feel the comfort.

A multi-slide door should complement other doors in the building and we suggest you choose a multi-slide door that matches the proportions, stiles and rails of those doors and doing that, in our opinion, will give the structure a more polished and professional appearance.

Expansion Types and Configurations

13. **pivot**door

ALUMINIUM PIVOT DOOR

Pivot doors have become a common feature in many homes today. They are especially popular in modern-day homes as they give a stylish look while offering lots of benefits. These doors are also known as pivoting doors as they pivot inwards or outwards. An aluminum Pivot Door is the type of door that opens closes in the same way as a regular door. They are perfect for those who want a wide opening.

An aluminum pivot door is a door that pivots. They are also known as swing-up or swing-away doors, as they swing outwards when opened, and swing inwards when closed. The door also has hinges that allow you to open and close it. An aluminum pivot door can be a stand-alone door or it can be integrated with a gate. It is usually made of aluminum and has a sheathed or extruded profile. They are perfect for those who have a small garden, and don't have space for a fixed door.

Durable – These doors are made from aluminum which is a durable metal. An aluminum pivot door can withstand the wind and the weather. This means that these doors are ideal for those who live in areas where the weather is harsh such as the desert where high winds can spring up and test the strength of all fixed structures. This door can likely take it.

Perfect for Areas with High Temperatures – Most people don't like using a door that opens inwards as it makes the space smaller. This is because when the door is open, there is less space available which is less convenient.

Aluminum pivot doors are perfect for those who want to save space; they don't take up much space. They are also easy to clean and are durable which makes them ideal for any home. These doors are also perfect for areas with high temperatures, as they don't open inwards. These doors are ideal if you want a door that opens and closes simply, easily and without fanfare.

15. frenchdoor

FRENCH DOORS

French doors need no introduction. Long a classic architectural look in homes across the world, no door has more versatility. Outdoors or indoors, this door defines spaces between rooms or between any space. Let the light in...

With the french door series, which includes full-length glazed, veneered or lacquered doors, you can let as much light enter your living spaces as you want. It is possible to create a spacious effect that reflects your style in the interiors with the double wing door options that can be applied especially in large areas such as the living room.

Our Exterior French Doors will give your home a touch of class. Each one is made by experienced craftsmen using quality materials. Outward or inward openings are available, with features including security locking and low mobility access.

Create a light and airy segue from home to garden with one of our astonishing French doors. Your external doors don't need to protect your privacy to the same extent as the front door, thanks to your garden and exterior fencing. Instead, French doors are an attractive option to create the illusion of more space in the home.

There's a wide variety of French patio doors available on the market to suit your personal taste, like aluminium french doors or wooden french doors. Contemporary aluminium french doors complement modern interiors and are designed to be energy efficient. If you prefer a more bohemian look, timber french doors are a classic but stylish design.

16. frenchdoor

17.sunroom

18. sunroom

MOTORIZED GLASS ROOFS

Selecting motorized roofs allows homeowners to pick a “sky view” - Stars? Migrating birds? Lightning? Cloud cover? RAIN? Hear those rain drops! Talk about relaxation and, here’s what the National Institute of Science says, “Evidence of the health benefits of natural sound-scapes and quantifies the prevalence of restorative acoustic environments in national parks across the United States. The results affirm that natural sounds improve health, increase positive effect and lower stress and annoyance.” And, it’s all at the touch of a remote control with this roof, too.

A sunroom is one of the best ways to expand living space and create outdoor fun for family. Our high quality sunroom can be used all year around because we use a thermal aluminum frame and double glazed tempered and E-Low energy efficient glass. Our main goal is to provide the best insulated high comfort indoor area possible by making a sunroom an enjoyable part of your home.

When you build an enhanced sunroom, you are not only adding an additional living space to your home, but you are also enhancing the functionality of your kitchen, family room, and dining area. The addition of a sunroom can be costly, but the money you invest will surely increase the value of your home at resale time not to mention adding many health benefits. Perhaps you will even double or triple the amount you spent on the sunroom down the road? That’s a very good investment not counting all the fun you and your family enjoyed using that extra space in any number of ways for fun.

19. sunroom

ALL SEASONS FULL PROTECTION

Sunrooms can be an excellent choice for additional space that is high comfort as well as energy efficiency while providing a very comfortable climate. By following these guidelines, you can make your new sunroom a valuable addition to your home. A sunroom is an excellent way to enjoy the outdoors indoors and save money. They are great investments for a variety of purposes. For example, by providing natural light to the interior of the house, they can reduce the need for additional lighting and can cut your electric bill. Many people have discovered that the added light can actually boost their mood and provide several health benefits. Those benefits are worth the extra money you'll spend on the new addition and, remember, it increases the resale value of your home. In addition to being a cost-effective way to add additional space to your home, a sunroom can also provide a more attractive look to your home making it stand out on your block as a more modern and spacious home.

ENHANCED LIFE STYLE

20. pergola

What Vision Art Aluminum does is especially suited for precious customizes products... Doors, windows, sunrooms, pergolas, etc. to your unique space... Your walls, yard, garden, in proportion to your home's space. This means your amazing, professional job is completed with less time, mess and more beauty is added to your already beautiful and prized home. We treat your home as sacred space just like you do.

PERGOLA

These are high-quality, three-layer fabric, motorized, awning systems that protect us from the summer heat by shielding us from the sun's harmful rays. We can stay dry out doors even while its raining and we can be impervious to the impact of severe weather conditions.

And, rails and other moving parts do not make sound and do not require maintenance, either. With a remote-control unit, a motorized awning system brings a very practical and healthy cover to use its attractive retractable feature. Also, it becomes a closed space in severe weather conditions in winter. All year long, a motorized awning system brings you outdoor fun in all four seasons.

FOR YOUR HOME PERGOLAS

Extend your outdoor living space – this variable system allows you to minimize sun & heat while giving you the flexibility to adapt your space to your family's needs.

Works in a variety of settings – from patios and decks, to pool areas and courtyards, Apollo Louvered Systems work with almost any outdoor space.

Rooftops and high rise balcony covers – want to extend your rooftop/balcony usage? We have a solution for you.

Plant climbing and flowering vines, grapes (make wine!), etc and create an arbor, in fact, pergola means “arbor or trellis” in Italian/Latin!

21. pergola

A photograph of a modern outdoor dining area. A pergola with a dark, slatted roof and integrated lighting covers the space. The floor is paved with light-colored tiles. Several tables and chairs are arranged for dining. In the background, there are glass-walled buildings and string lights hanging from the pergola structure.

22. pergola

FOR BUSINESS PERGOLA

Restaurants and guest dining areas – increase your profits with year-round dining (while also enhancing your customer's experience)

Office buildings – provide more usable outdoor community areas to expand options for employees and customers

Rooftop shade and Pergolas – increase your useable space and your customers experiences with lovely the views

23. pergola

BIOCLIMATIC PERGOLA

A bioclimatic pergola is designed to mimic the natural arctic climate of the earth. This allows it to regulate temperature and provide intelligent solar protection. It can be customized to fit any outdoor space, and it can be installed in a single day. It is also compatible with home automation systems.

It features slim and minimal lines and thick profiles with a choice of metal or wooden construction.

- Energy Save
- Dual Panes
- Low E Coating
- Gas Fill
- German Technology
- Best Workmanship

24. pergola

RETRACTABLE PERGOLA

A retractable pergola is an attractive outdoor structure with slatted roofs that can be adjusted to block sunlight and protect from summer showers. These structures are a popular option for homeowners looking to add a canopy to their home for outdoor entertaining.

The patented design of these structures allows for unlimited protection from the sun and rain during summer and other weather phenomena during winter.

- Waterproof
- Bad Weather Resistant
- UV Resistant
- Four Season
- Full Flexibility
- Latest Technology

25. windows

PANORAMIC WINDOWS

Panoramic windows are huge, beautiful “tapestries” of the sky, the grass, mountains, the flowers, the stars...or the kids in the pool. They put on display breathtaking outdoor spaces inside your home for everyone and, especially, those members of the family, sadly, not able to go outside. For people with outdoor limitations, this window is an absolute life saver, and, Vision Art Aluminum, loves making it available to our customers especially those burdened by a disability. These windows bring nature closer to a home; we all know the therapeutic impact nature has on wellness and balance. Don't we?

26. **bifold**windows

BI FOLD WINDOWS

High function, high style, high elegance folding into each other like the petals of an elegant flower. Its classic and simple look fits any home style and interior décor and, like everything else we install, it's custom made. This very popular window ensures excellent ventilation and light while providing unobstructed views of your garden, your pets or your kids. It doesn't end there. With seamless gliding performance, bi-fold windows are a customer favorite for their smooth, simple operation while connecting indoor and outdoor spaces.

27. **bifold** windows

INNOVATIVE BIFOLD WINDOWS DESIGNS

There's no need to walk around to a door when passing in vegetables grown in your garden or passing out a cool drink to the sundrenched "farmer" who grew them. Add a counter-top there and a refreshment stand capacity for a cup of tea, a glass of wine, lunch or hot food from the BBQ for your guests. Sky's the limit, use your imagination with this bright light in home upgrades for a well thought out modern, 21st Century home with comfort, style and convenience.

29. **bifold**windows

IT STILL DOESN'T END THERE

One can utilize this fantastic window to connect indoor spaces as well. Remember when there was a window from the kitchen into the dining room that proved very handy for holiday or even everyday meals...it saved steps for the busy homemaker and it certainly was easier and safer than carrying scalding ovenware from one room to another. NJ's Vision Art Aluminum is always thinking about practical answers to tomorrow's needs today.

A bifold window can create unobstructed visibility into a child's playroom while blocking out sounds of loud music, TV, laughter, singing, hooting and a hollerin and un-adult-erated fun. It's a good choice for a window seat overlooking the Adriatic Sea at your villa, too. Don't forget to make that bi-fold window seat fit at least two even if the second is your cat. Here's to your health from all of us here at NJ's best bi-fold window supplier, Vision Art Aluminum

30. windows

MOTORIZED WINDOWS

We've all struggled with windows that are stuck. Never again? Vision Art Aluminum has you covered again. Easy to open and shut too with remote control units; featuring "it can't get easier than this" as our usual awesome windows take it another step forward to luxury and convenience. No one is getting younger, why struggle?

Disabled people in the home or healthy people getting older... Think about it now because how often do homeowners replace windows? Do it once and be done with it. Call us, let's talk and answer your questions about this important addition to any home given climate change and who knows what?

Both these items make a house a 21 St Century home. First, they are a wise investment that increases the value of your home with push button remote control that lets you operate blinds and shades without touching them. Blinds and shades are safer between window panes with no chords that can injure or kill kids and pets, privacy where you want it, energy efficient savings on home heating, improved sleep patterns, adds to your home's security with pre-made remote settings and it looks like someone is home even when you aren't. Also, the sun can damage your upholstery or décor however if you pre-set your remotes to close shades or blinds, this can never happen. Convenienced to the max; shall we go on?

31. windows

TECNICALLY WINDOWS

Modern windows can be quite energy efficient. The best windows include a high-performance glass, a tight fit and thermal insulation. These features increase energy efficiency and improve aesthetics. When purchasing a new window, you will need to consider the style and location of the home the material it's made of and the cost.

TYPES FOR YOUR CHOICE

Fixed Windows: A unit covered with a low profile glass. It will give you an unobstructed view.

Commercial: It will give you an excellent option for your building designs. Our window options with thermal properties will be ideal for you.

Simulated Hung Windows: You can benefit from our service with sliding, single or double opening features and options for both residential and commercial uses.

Hung-Slider Windows: It is the window service that opens by sliding the lower wing vertically while the upper wing remains fixed. In addition, there is a window system with side-by-side wings, one of which remains fixed while the other opens.

Casement Windows: Side hinged casement windows will offer you different options for commercial and residential projects.

Awning Windows: Top hinged outward opening awning windows will add a different perspective to you.

Tilt-Turn & Hopper Windows: The windows, which are designed in the form of hinges at the top and open by swinging inwards, are also in the tilt position. In addition, we also have a model that works when the hopper window sash moves inward from the top or bottom.

33. zipscreen

BEST QUALITY ZIP SCREEN

Heroal zip screens are custom-fitted to cover curtain walls, doors and windows. Our expert team is ready to customize your order and install your zip screen in a professional manner. Here are some benefits of zip screens: they are convenient and hassle-free to install. The locking pattern is simple to use and the external side channels make it easier to open. The zipper screen fits perfectly to your home or office windows, and is custom-made for maximum privacy and security.

34. zipscreen

Energy-Saving

Clean Air

Reflect Style

Smart Guard

It keeps out mosquitoes, mud and insects. Venetian blinds are unsuitable for large-scale conditions as they let insects and other critters into the interior. You can contact us for your zip screen requests which are easy to install. They provide a modern look to your home. The screen's locking pattern is easy to use and its external side channels are easy to access and use. Because they're custom-made, you can choose a size that fits your windows perfectly. You can also design your screen to fit any shape and color. For example, if you want a more custom-made option, you can choose a custom-sized design for your zip screen.

Zip Screen is incredibly easy to install. Three options are available, including surface mount, in-wall, and in-ceiling. Surface mount is ideal for pre-existing buildings, while in-wall installation hides the installation hardware inside the wall. In-wall is used for newly-built buildings. When you decide on a zip screen for your home, make sure you choose one that fits your exterior. And be sure to buy the right color and material.
